PROFILE

Computer Engineer (ESPRIT, ERP-BI & Data specialization), I design **end-to-end** data solutions: business requirements gathering, **data integration** (Python, APIs, Talend), **Data Warehouse**, **Power BI dashboards**, **Machine Learning** and **automation** (Power Platform). Certified **Power BI Data Analyst (PL-300)** and AWS, currently preparing the **DP-700** (Fabric Data Engineer). Rigorous, autonomous and comfortable presenting my work to decision-makers.

PROFESSIONAL EXPERIENCE

Data Engineer — Project Analysis & Performance Management — EXCELLIA Solutions *Feb. 2026 – Aug. 2026*

Project: *Project and resource performance management platform (Python, Power BI, Power Platform, ML, generative AI)*

- **Data pipeline:** Python extraction via API (authentication, pagination, error handling) in a **Medallion architecture** (Bronze, Silver, Gold): 25,000+ rows, **−40% manual data collection**.
- **Reporting:** galaxy schema model and Power BI dashboard with **30 DAX measures**, scheduled refresh; 9 projects and 51 employees tracked, **adopted by 3 managers**.
- **Machine Learning:** several predictive models (resource performance, resolution rate): **90% accuracy**.
- **Generative AI:** agent reading TMDL files to automatically document the semantic model, with a natural-language Q&A chatbot.
- **Power Platform:** 5 Power Apps forms with input validation; Power Automate flows (≈ 3 hours saved per week).

Business Intelligence & Data Engineer — Meninx Holding *Jul. 2025 – Sep. 2025*

Project: *Data Warehouse and decision-making dashboards for Cosmitto*

- **Requirements & KPIs:** interviews with 6 decision-makers and definition of **12 KPIs** (Purchasing, Sales, Losses, Inventory).
- **ETL:** integration of 4 sources (Excel, PostgreSQL, Odoo, Sage) with **Talend** and a Staging Area (cleansing, deduplication, quality checks): 1,400,000+ rows, **−35%** data preparation time.
- **Modeling & reporting:** galaxy schema Data Warehouse and interactive Power BI dashboards (drill-down, time comparisons).

Salesforce Developer — TALAN Tunisia *Jul. 2024 – Sep. 2024*

Project: *Business process automation on Salesforce CRM*

- Customization of 3 applications (objects, fields, Lightning pages, validation rules) and **8 business process automations** (Flows, Workflows, Apex) within a team of consultants.

PROJECTS

Comparini — Price comparison platform *(Scrapy · Selenium · Talend · MySQL · Flask · Angular · Power BI)*

- **Collection:** scraping (Scrapy, Selenium) of 2,000+ offers from 5 Tunisian retailers: Monoprix, Géant, Carrefour, MG, Aziza.
- **ETL & Data Warehouse:** cleansing, normalization and cross-retailer product matching with Talend; MySQL data warehouse of 5,000+ products.
- **Application & reporting:** Flask REST API, Angular price comparison interface and 5 Power BI dashboards (15+ KPIs: price gaps between retailers, cheapest retailer by category).

BI solution for flight delay analysis *(Data Warehouse · SQL · Power BI · DAX)*

- **Modeling:** star schema Data Warehouse (flights, airlines, airports, dates, delay causes) loaded with SQL: 20,000+ flights.
- **Analysis:** Power BI dashboards with 12 DAX KPIs (on-time performance, average delay, delay causes by airline, airport and period).
- **Decision support:** critical and optimal thresholds with conditional formatting to flag airlines and routes to monitor.

SKILLS

Languages: Python · SQL · R
BI & Reporting: Power BI (Desktop & Service, DAX) · SSAS · Excel · Dimensional modeling (star, galaxy schema)
Data Engineering: ETL/ELT (Talend, SSIS, Python) · REST APIs · Medallion architecture · Microsoft Fabric · Spark · Hadoop · Elasticsearch
Databases: SQL Server · PostgreSQL · MySQL · Oracle
AI: Machine Learning · Deep Learning · NLP · LLM · RAG · MLOps
Power Platform & tools: Power Apps · Power Automate · Dynamics 365 · Salesforce · Jira

EDUCATION

ESPRIT (Private Higher School of Engineering and Technology) — Engineering degree (5-year Master's level), Computer Engineering, ERP-BI & Data specialization *Sep. 2021 – Sep. 2026*

CERTIFICATIONS

Power BI Data Analyst Associate (PL-300, Microsoft) · Microsoft Fabric Data Engineer (DP-700, in preparation) · AWS Cloud Foundations · Data Engineering on AWS – Foundations · Deep Learning (NVIDIA DLI) · Microsoft Fabric Training · CodeQuest Power BI

LANGUAGES

Arabic (native) · French (fluent) · English (B2) · German (B1)
